## DESCRIPTION OF THE PREFERRED EMBODIMENT

### **Rough-Terrain Transporter**

---

#### ABSTRACT

A Rough-Terrain transportation apparatus for mobilizing injured or disabled individuals. The Rough-Terrain Transporter made of lightweight steel alloy comprised of a Mainframe with a Seat, the Seat having a back rest, having one wheel or ski, and extended handles in the front and rear. A wheel or ski beneath the Seat is centered between the sides, and centered at the balance point between the front and rear. The Rough-Terrain transporter has a Shock Absorber attached at the rear of the Wheel or Ski Support Structure for comfort during use. The Shock Absorber is mounted between the Wheel or Ski Support Structure and the base of the Seat on the Mainframe. The Wheel or Ski Support Structure and Front Extension Handles structure pivot at a common point at the front of the Mainframe.
